The area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crop by the village accountant. The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, jawar and arhar, bajra and arhar, and cotton and arhar, for which separate headings are provided in the crop statements are distributed in accordance with prescribed formulae and entered under the crops of which they are composed.

Columns 3, 4, 9, and 11.—The whole of the area of the land planted with food-grains wheat, barley, gram, etc., mixed with oilseeds is shown under food-grains in this table. The area shown under food-grains which was really planted with oilseeds (as a mixed crop) is roughly estimated to have been 3,371,000 acres in the whole of the United Provinces of Agra and Oudh in 1913-14.

Columns 12, 13, and 14.—The figures shown in these columns represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop. Besides these, the oilseeds are thinly sown in combination with wheat, barley, gram, and other crops. If the areas occupied by the scattered plants were added up, it is estimated very roughly that they would amount in 1913-14 (for the whole of the United Provinces of Agra and Oudh) to 367,000 acres of linseed, 850,000 acres of sesamum, and 2,154,000 acres of rapeseed.

There is no agency for the collection of statistics in Almora, Garhwāl, and the hill tracts of Naini Tal and Mirzapur. Estimates have, however, been made for Garhwāl and the hill tracts of Mirzapur; but those for the latter have been omitted since 1910-11 owing to their inclusion in the Benares State

In Cachar accurate statistics of the area under crops other than tea are available only for the cadastrally surveyed tracts, in Sylhet only for the Jaintia Parganas and Partabgarh, and in Goalpara only for the temporarily settled tracts. The figures for the permanently settled tracts in Sylhet and Goalpara and for the unsurveyed areas in Cachar are based on estimates. The figures for the five upper districts of the Assam valley represent the whole cropped area in these districts, with the exception of a small area cultivated by tribes paying house or poll tax in Lakhimpur, Sibsaagar, and Kamrup. In the Garo Hills district returns of areas under different crops are available for the plains tracts only, while those for the hill portions are estimates. The figures for the Khási and Jaintia Hills and the Lushai Hills are rough estimates. Detailed statistics of the areas under different crops are not available for the Naga Hills.

*Note.*—Figures for 1912-13 are based on a cattle census taken in 1912; the figures for most of the districts, in columns 2 and 3 have, however, been revised since the publication of the previous issue of this volume. The census did not take into account the animals named in columns 7 to 11 nor ploughs and carts (columns 12 and 13). The figures for the years 1909-10 and 1910-11 for the districts of the Presidency and Burdwan Divisions and for Darjeeling are based on estimates. The figures for 1907-10 for Faridpur are based on information collected during survey operations conducted in that district in the period mentioned.

*Note.*—A census is taken every five years in Government (raiayatwari) villages. The last quinquennial census was taken in 1909-10. In inam villages, there is no suitable agency for the work, and Collectors obtain information for these villages as best they can: it is not known to what extent any census is made in them. Previous to 1909-10, no information was available regarding live-stock in permanently settled (zamindari) estates and in towns and cantonments which did not form part of any revenue village; but from that year estimates for all these tracts have been prepared and included.

*Note.*—The figures are collected once in five years. The last quinquennial census was taken in 1909-10. All animals belonging to a family are entered against the name of the head of the family even though the animals are temporarily absent from the village. Animals belonging to other villages are excluded, and those belonging to a roving grazer who has no permanent residence are noted, but are not included in the village resources. The figures are regularly tested by circle inspectors (kanungoes). Stock statistics for the city of Bombay were collected for the first time in 1909-10.

Note.—The table is prepared quinquennially on a census in each district taken every five years. The last census, which was due in 1913-14 but could not be taken in that year owing to famine in some of the districts, was taken in 1914-15 in all the districts except Almora, Garhwal and the hill tracts of Naini Tal. In these latter districts the last census was taken in 1912

Note.—The figures for 1909-10 to 1912-13 are only estimates received from time to time on the basis of settlement records or reports of police enquiries. The figures for 1913-14 shown in the table for all the district of the Province, except Hazaribagh, Ranchi, Palamau, and Manbhum, were arrived at by a census of live stock held in these districts towards the end of 1913. For Hazaribagh and Ranchi (excluding the area since transferred to Palamau in the case of the Ranchi District) the figures are based on information collected during survey operations; while the figures for Palamau and Manbhum are based on police reports.

*Note.*—The figures are collected annually, between the 1st January and the 15th March, by the patwaris for each village of the areas in their charge. The total figure is recorded in the tahsil by the kanungo in a village register. The patwari takes into account all animals including those temporarily sent elsewhere (e.g., for grazing), which belong to residents of the village, and excludes animals which are temporarily in the village for grazing or other purposes, but do not belong to residents. Stock in cities, large towns, and cantonments has been included from 1906-07 and that in forest villages from 1907-08.

Note — A census is made annually by the village officers. All cattle belonging to one owner are entered against his name, even though the animals are temporarily absent from the village. When an owner cultivates land in more than one village, the actual number in each particular village on the night of enumeration is entered in the statement for that village. Cattle belonging to other villages, but temporarily in the village for grazing, are not entered in the statement for that village.

Note.—The statistics are based on a cattle census taken every five years. The census is, however, not taken simultaneously in the different districts. In the Assam Valley districts (excluding the permanently-settled tracts of Goalpara) and in Sylhet (Jaintia parganas only) the last census was taken in 1910. In Cachar it was taken in 1912, and in the Garo Hills (plains portion only) in 1913. No statistics are available for the permanently-settled tracts in Goalpara, for tracts other than Jaintia parganas in Sylhet, and for the hill tracts.

(a) For Jaintia Parganas only. The figures for 1904-05 include estimates for other tracts also, but such estimates are not available for 1909-10.

Note.—The varieties of tenure are included, as far as possible, under one or other of the following heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). Areas under forests are included under the prevailing tenure of the province except in the Central Provinces and Berar.

Entry 2 (a).—Areas held revenue-free or at privileged rates are deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population (head 10). In Madras, Bombay, and Berar all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) is classed for the purposes of this head as "area not fully assessed." Area should not be entered under this head merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

Entry 3.—This head is subdivided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste, and should be either equal to or less than the net cropped area as shown in column 6 of Table II.

(§) The land revenue assessment necessarily differs from the land revenue collections which include collections on account of former balances and exclude so much of the assessment as has not been collected during the year.

Column 10.—The incidence is calculated from the occupied area, which, in the Presidency proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area.

Column 11 includes population of pôt inâms and the like scattered areas which cannot be distinguished from the population of the fully assessed area.

Column 12.—The incidence is based on the figures given in column 11 and those in column 8, plus the amount of full assessment on privileged lands held in fully assessed villages at less than that assessment.

No figures have been entered in columns 8 to 12 opposite "Lucknow, permanently settled," (page 303) as no portion of the permanently settled area has been fully assessed to land revenue.

Columns 13 and 14.—The figures are taken from the census reports of 1911.

Column 11 includes population of revenue-free lands when the area of such lands is less than an entire village. The inclusion does not materially affect the incidence entered in column 12.
